EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bradley N. Ruben on February 25, 2005.

Amend claim 19 and add claim 40.

19. (Currently amended) A wiring board, comprising:

a board of at least one layer comprising a conductor part and a ground part, said conductor part comprising signal line conductor patterns,
said ground part comprising

a ground pattern or

a ground surface deployed over the entirety of one surface of said board;
at least a portion of said conductor part being formed by an electrically conductive magnetic thin film; and

a thin film magnetic loss material deployed on part of said board or on said conductor part.

40. (New) The wiring board according to claim 19, wherein said conductor part is formed of an electrically conductive magnetic thin film.

Allowable Subject Matter

Claims 19 and 23 – 40 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Ehman et al. teaches a multi-layered printed circuit board comprising a signal line with inductive elements 52, the inductive elements having a thin film magnetic ink 54 but does not teach any ground connections in the circuit, nor does Ehman et al. teach or suggest any connection to ground, thus the claims are in condition for allowance.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Saitou et al. – teaches a thin film ferrite paste.
